SUBJECT INDEX TO VOLUME 2

Annular impinging jet heat transfer, 1

Curved tube, fully developed flow in, velocity distribution and turbulence structure of, 353
Cylinder cross-flow heat transfer in drag-reducing fluid, 113

Direct-contact condensation on water in turbulent flow, a theoretical and experimental study of, 129

Electrical conductivity of plasma, SILEP-1 system for measuring in MHD generator channels, 173
European in-pile core debris bed experiment, numerical simulation and interpretation of, 257

Liquid-liquid spray columns, temperature measurement in, 279

Measurement techniques for horizontal flow boiling heat transfer, pure and mixed refrigerants with, 237

Natural-convection heat transfer:
  dynamical behavior of in a double-loop system, 13
  interferometric investigation of open-cavity, 27
  shrouding, effect of, on air from staggered vertical fins, 105
Newtonian fluids in asymmetrically heated rectangular channels, turbulent heat transfer performance of, 227
Nomenclature in heat transfer publications, use of physical quantities, units, and mathematics, 149
Nonintrusive technique for concentration distribution measurement in enclosures, 215

Photoelectric recording, multifunctional laser facility with, for plasma diagnostics, 179

Radiation properties, infrared, of Ethylene, 91
Radiative flux measurements in a sooty pool fire, 189
Rib angle-of-attack and pitch-to-height ratio, combined effects of, on mass transfer from a surface with transverse ribs, 291

Scattering particulate, radiative properties for, experimental determination of, 309
Shifted crossed-beam (SCB) method in a dispersed two-phase flow, the measurement of local values of the characteristic parameters for, 71
Single- and two-phase flows in a subsonic model gun, heat transfer and velocity characteristics of, 333

Thermophysical property data for fluids, a scientific approach to, 41
Turbulence heat flux in a large rectangular air cavity, direct measurements of, 59

Viscoelastic flows through rectangular passages, turbulent heat transfer and pressure drop measurements for, 201
